EXPERIENCE

Workday

Software Development Engineer

Boulder, Colorado

June 2024 - Present

- Designed and implemented an asynchronous file upload pipeline in Java for the Subscription Management application, improving throughput and enabling concurrent processing of large-scale usage data
- Developed custom usage fields feature using TypeScript, React, and GraphQL, supporting flexible billing models and dynamic data schema modifications in PostgreSQL
- Implemented frontend role-based gating to control page and feature access based on user permissions and entitlements
- Collaborated with product managers, QA, and cross-functional teams in agile environment, participating in sprint planning, code reviews, and design discussions using Jira and internal tooling

Sarus Lifting

Full Stack Developer

Denver, Colorado

January 2023 - March 2024

- Worked at a three-person pre-seed startup, taking on multiple roles: attended customer interviews, managed database and frontend UI/UX, and provided strategic input on company direction
- Developed 3D crane rigging visualization using three.js, ground bearing pressure calculator with physics equations, and redesigned app UI with Figma
- Built oversize/overweight truck routing application from scratch using TypeScript and Trimble Maps API

Amazon

SDE Intern, AWS EC2 Analytics

Seattle, Washington

Summer 2022

- Optimized SQL queries on petabyte-scale data warehouse, improving performance by up to 20x
 - Built ETL pipeline using AWS Lambda, S3, Redshift, and CloudFormation to automate data processing
 - Participated in code reviews and created design documents following Amazon engineering standards
-

PROJECTS

What Would You Pay?

Full-Stack App, Vue, TypeScript, Fastify, PostgreSQL

- Developed a full-stack application for users to submit and compare price valuations for randomly generated game ideas.
 - Engineered the server-side logic using Fastify and PostgreSQL, handling complex data validation and ensuring data persistence.
 - Implemented the front-end using Vue.js and TypeScript, showcasing modern component architecture and clean UI/UX design.
-

SKILLS

Languages: JavaScript, TypeScript, Python, Java, C++, Kotlin, C#, SQL, HTML/CSS

Frameworks: React, Node.js, Express.js, Fastify, Vue.js, three.js, Unity

Databases & Cloud: PostgreSQL, MySQL, MongoDB, Firestore, AWS (S3, EC2, Lambda, Redshift, CloudFormation), Cloudflare, Heroku, Railway

Tools: Git, Jira, Notion, Trello, Figma, Agile

EDUCATION

University of Colorado Boulder

Bachelor of Science: Computer Science

Boulder, Colorado

May 2023
